**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 18-20, drawn to a semiconductor device, classified in class 257, subclass 758.
  - II. Claims 1-17, drawn to a method of forming a semiconductor device, classified in class 438, subclass 622+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process, for example, the patterned fluorinated layer can be made in two stages, the first stage with a first fluorine concentration, and the second stage with a second fluorine concentration instead of exposing the fluorine containing film to a reducing plasma or a hydrogen containing plasma.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2811

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
